CGMEJIA

Hi! I'm Christian Mejia, a 4th-year Information Technology student specializing in web and mobile application development. My fascination with computers started at a young age, inspiring me to pursue a career in IT. Over the years, I've developed a strong foundation in programming languages like HTML, CSS, and JavaScript, Express JS as well as frameworks like React, which I've applied in various projects that have honed my development skills. Alongside my technical expertise, I'm committed to effective communication with clients, colleagues, and end-users to ensure that projects run smoothly and meet everyone's needs. I also enjoy troubleshooting hardware and software issues, using my curiosity and technical know-how to help others and continuously improve my skills.
